PROFILE

Java and Full Stack Web Developer with hands-on experience in building scalable applications and solving real-world problems using Data Structures and Algorithms. Proficient in both frontend and backend technologies and database management, with a strong foundation in core Java and algorithmic problem-solving.

EDUCATION

Maharaja Agrasen Institute of Technology 2022 - 2026
Bachelor of Technology in Information Technology, 8 CGPA

EXPERIENCE

Software Development Intern, KompGlobal Solutions Pvt Ltd. Jan 2026 – Present

- Developed and maintained React.js interfaces for Timesheet, Client, and Candidate management modules in a production application.
- Implemented the Forgot Password functionality, including form validation, API integration, and user feedback handling.
- Fixed production and QA-reported bugs, improving application stability and user experience.
- Collaborated with backend developers and QA teams to deliver feature enhancements and resolve application issues.

Full Stack Web Developer Intern, Edunet Foundation Feb 2025 – March 2025

- Engineered an online bidding application with JWT-based user authentication and real-time auction capabilities.
- Crafted a visually appealing and responsive interface using React.js and Bootstrap.
- Implemented a scalable backend architecture with Node.js and MongoDB to ensure seamless performance.

PROJECTS

E-commerce Website

- Tech Stack: Built a full-stack e-commerce application using Node.js, Express.js, React, and MongoDB to support seamless user interactions.
- User Authentication: Configured secure user registration and login with encrypted credentials and session handling.
- Payment Gateway: Integrated Stripe API and Cash on Delivery options to enable multiple transaction methods.
- Admin Panel: Established a role-based admin interface for managing products, orders, and user data efficiently.
- Notifications: Incorporated React Toastify to provide real-time alerts and improve user feedback. (Live Demo)

AI Career Navigator

- Tech Stack: Developed a full-stack career assistance platform using React, Node.js, Express.js, MongoDB, and Bootstrap to support job discovery, career guidance, and interview preparation.
- Job Recommendation System: Implemented skill-based and resume-based job search functionality by integrating external job APIs, allowing users to fetch relevant job listings by skills, location, or resume content.
- Resume Processing: Enabled PDF resume uploads using Multer and implemented server-side text extraction to identify skills and match them with suitable job roles.
- AI Career Chatbot: Integrated an AI-powered chatbot using OpenRouter (Llama 3.1) to provide career roadmaps, interview preparation guidance, and personalized skill recommendations through a conversational interface.
- User Experience: Designed an interactive dashboard with chat interface, job listings, and dark/light mode support to improve usability and accessibility. (Live Demo)

Task Manager

- Tech Stack: Created a full-stack task management application using React.js, Node.js, Express.js, and MongoDB

to manage user-specific tasks efficiently.
- Task Management: Enabled users to create, update, delete, and mark tasks as completed with real-time status synchronization between frontend and backend.
- Dashboard & Routing: Designed a dashboard-driven interface with separate views for pending tasks, completed tasks, and user profile using React Router.
- API Integration: Integrated RESTful APIs using Axios for seamless communication between client and server with authorization headers.
- Deployment: Deployed the frontend on Vercel with environment-based configuration and production-ready build setup. (Live Demo)

TECHNICAL SKILLS

Skills: Data Structures and Algorithms (Java), Full-stack Web development

Languages: Java, Python, C/C++, JavaScript, SQL, Advanced HTML/CSS

Databases: MongoDB, MySQL

Frameworks: Tailwind, Bootstrap, Node.js, Next.js

Libraries: React, Redux Toolkit, Express, Mongoose

Developer Tools and Operating System: Git, GitHub, Postman, VSCode, Firebase, Windows
